

MACNOR[®]
MARINE

The Company

Macnor Marine was established in 2003, in Rio de Janeiro, together with a group of Norwegian equipment suppliers for the maritime and offshore markets.

We exclusively serve our brands in Brazil. The Norwegian culture is inside our culture as a principle in the company when it comes to product quality and solutions we offer to the market ice operate.

Sales, after-sales and service teams are trained annually at offices and factories in Norway to ensure a Norwegian quality experience in our deliveries.

Our premium solutions portfolio starts with Ship Projects and Design, a varied scope for propulsion, automation, deck equipments, safety, accommodation and others solutions for Newbuilding and retrofits.

In recent years, we have focused our investments on our services and after-sales division. We have a team of specialists ready for going onboard wherever the ship or platform is located to solve your problem.

We use our service bases in Niterói, Itaboraí, Macaé and Porto Açu, for repairs and interventions on equipment, as well as a stock of spare parts.

Main activities

- ▶ Sales prospection and development (Exclusive brands and representatives)
- ▶ Services (Team of engineers trained and certified to perform services on board or on site)
- ▶ Aftersales (Logistics, contracts and availability of parts and components supply)
- ▶ Engineering and Projects / Design of ships and specific systems
- ▶ Business Development / Consulting
- ▶ MRO (Maintenance, Repair, Operations), Sourcing, Procurement & Trading company

Equipment Division

PROPULSION

- ▶ Main Propulsion (Azimuth and Shaft/Propeller)
- ▶ Thrusters (Tunnel, Retractable, Azimuthal)
- ▶ Dynamic Positioning (DP) System
- ▶ Oil Purifiers

DECK EQUIPMENT

- ▶ Winches, Cranes, A-Frames and Davits
- ▶ FIFI fire fighting system
- ▶ Service Boats (Rescue, Towing, Diving and Patrol)
- ▶ Oil Spill Equipment (Combat and containment of oil spills at sea)
- ▶ HPU, Compressors
- ▶ Sewage treatment plant and Water Makers

FLOW SYSTEMS

- ▶ Pumps for any type of fluid
- ▶ Multi-Application cargo system (wet-and-dry)
- ▶ Agitators
- ▶ Electric valves and actuators
- ▶ Ethanol cargo/transfer Pumps

ELECTRICAL, LIGHTING AND HELIDECK SYSTEMS (EX)

- ▶ Explosion-proof outdoor Lighting
- ▶ Navigation lights, searchlights and Helideck
- ▶ Windshield wiper systems
- ▶ Typhon horn

ACCOMMODATION

- ▶ Air conditioning and Refrigerator (HVAC-R)
- ▶ Sanitary System and Sewage Treatment Plant
- ▶ Internal fire fighting system (NOVEC/Watermist)
- ▶ Furniture (MDF, Marine Plywood, Steel)
- ▶ Galley, Pantry, Kitchen and Laundry
- ▶ Fireproof Windows and Doors
- ▶ Panels B15 / Rockwool, or honeycomb type, Floor, Doors, fire blankets, etc.

MRO (Maintenance, Repair, Operations) / Multibrand

- ▶ Sourcing and Procurement solution for different equipment and materials
- ▶ Specific demands outside our exclusive scope

Projects, design & solutions

PROJECTS & DESIGN

We provide naval projects for several markets and segments Oil & Gas, Offshore Wind, Fishing, RoPax, Yacht/Cruise among others.

PROJECT CONVERSIONS

Conversions, upgrades and retrofits are smart alternatives for fitting a contract and optimizing the performance of your existing tonnage.

ENERGY SOLUTIONS - LOW EMISSIONS

We are committed to the environment and sustainability.

We develop energy solutions and equipment aiming at the goal of "ZERO EMISSION" through battery banks, hybrid and electric propulsion, among others, applicable to new constructions and conversions.

SCANNING AND CONDITION MONITORING

Remote monitoring of the actual condition of equipment and components, with online support from the factory.

Norwegian
Quality Experience
in **Brazil**

Service division

Installation and Commissioning

We offer Installation and carry out commissioning to ensure the operation and warranty of the equipment.

Services and maintenance

We have the solutions you need to keep your equipment in top shape and efficiency. We carry out inspections, preventive and corrective maintenance on board or in our service bases, as well as more complex interventions such as Overhauls and machining in our service bases.

24/7

Our 24/7 customer service is operated by trained engineers with direct contact to 24/7 factory channels.

Spare parts

We have a stock of emergency spares in Brazil, and we have direct and unique access to stocks at the factories. When purchasing through us, we guarantee factory origin (OEM certificates). Our import and logistics team are available to guarantee the best cost benefit, agility and care in the "Door-to-Door" transport of our equipment, based on a study of the exchange and replacement flow, both for regular or emergency maintenance.

Upgrade & Retrofit

Our team of engineers together with the "project managers" of the factories, can develop customized solutions for Upgrades and Retrofits.

Training

Our team can develop operational training in various applications such as Refrigeration and Air conditioning, Oil Recovery, FIFI, among others.

SPECIALTIES

- ▶ General factory inspections
- ▶ Automation solutions / Software updates
- ▶ Scaling / Zero Pitch
- ▶ Overhauls on Thrusters, Gearboxes and Bombs
- ▶ Exchange of stamps
- ▶ Alignment
- ▶ Machining
- ▶ Compressor repairs and upgrades
- ▶ HVAC system repairs
- ▶ Cleaning of air conditioning ducts and hoods
- ▶ Annual and 5-Year Certifications of Rescue Boats and Davits
- ▶ Structural repairs to Rescue and Workboats
- ▶ Repairs and Upgrades to Containment Barriers (Oil Booms)
- ▶ Repairs to winches and spools

Oil Spill Package

We supply all equipment for Oil recovery vessels (OSRV), including our brand, Macboom, Offshore containment barriers, a Norwegian project 100% manufactured in Brazil (RJ), developed by Macnor.

Our equipments package follows PETROBRAS specifications:

- ▶ Offshore containment Booms (+ Accessories such as HPU and Compressor)
- ▶ Skimmer
- ▶ Work boat + Davit (approved/LSA)
- ▶ Fire Fighting (FIFI 1 and 2)
- ▶ Chemical Dispensant
- ▶ Drone (service or product)

We offer specialized consultancy from existing ships to OSRV with inspections, design and actions for retrofit interventions through our engineering team, as well as training and operational courses for crew.
